HOSPITAL PRESCRIPTIONS

If you have been given a Hospital Prescription, this needs to be taken to the Hospital Pharmacy where they will dispense and supply your medication.
You should not have been advised to bring it to the GP surgery or a community pharmacy.

Hospital Pharmacy guidelines are as follows:

- *Where an item is prescribed which is out of stock, advise the patient when it will be available for them to collect.*
- *If they are unable to collect, arrange for a delivery to be made.*
- *If the product is out of stock on a long-term basis, contact the prescriber to arrange for an alternative.*
- *Where a patient is unhappy with the waiting time, if this exceeds 20 minutes, the patient can request a delivery.*
- *Where an item prescribed is non-formulary, refer back to the prescriber for an alternative. Do not dispense the item or tell the patient to obtain it elsewhere.*

Once the hospital pharmacy has dispensed your medication, please bring the Pink Copy to the Surgery so we can update your records.
